ABSTRACTS
Twenty-third Annual Congress of Japan Health Physics Society 501

ACCELERATORS
Measurements of radioactive gaseous releases to air from target halls at a high-energy proton accelerator 909

ACCIDENT ANALYSIS
An overexposure in industrial radiography using an ^{192}Ir radionuclide 117

ACCIDENTS, NUCLEAR
Nuclear accident dosimetry intercomparison studies 439

ACCIDENTS, POWER REACTOR
Biological retention of fission products from the Chernobyl plume 649
Health physics annotated bibliography 790

ACCIDENTS, REACTOR
Cesium-137 urinary excretion by northeastern (Pordenone) Italian people following the Chernobyl nuclear accident 99
Chernobyl radioactivity in a Turkish tea drinker 1017
Chernobyl radioactivity in Turkish tea: A response 495
Chernobyl-derived ^{137}Cs and ^{134}Cs in heather plants in Northwest England 485
Experimental determination of transfer coefficients of ^{137}Cs and ^{131}I from fodder into milk of cows and sheep after the Chernobyl accident 967
Final warning: the legacy of Chernobyl 218
Isotopic composition of high-activity particles released in the Chernobyl accident 707
Transfer of radiocesium from different environmental sources to ewes and suckling lambs 579

ACCIDENTS, TRANSPORT
Problems with proposed action guide for radioactive material transportation accidents 677
Reply to Finley's 'Problems with proposed action guide for radioactive material transportation accidents' 677
Risks of radioactive material transportation accidents in Oregon 131

ACTINIDES
Factors affecting the placental transfer of actinides S109
The use of animal experiments for assessing annual limits on intake and interpreting chest-monitoring data for workers exposed to industrial actinide-bearing dusts S221

AEROSOLS
A comparison of excretion and retention between the current ICRP lung model and a proposed new model S263
Aerosol deposition in the nose as a function of body size S299
Age-related scaling for aerosol and vapor deposition in the upper airways of humans S293
Application of lung deposition models to nonradioactive substances S309

AGRICULTURE
Mass loading of soil particles on plant surfaces 935

AMERICIUM-241
Modeling the influence of age at exposure and species on the fate of inhaled $^{241}AmO_2$ S185
The effect of Zn-DPTA treatment on ^{241}Am removal from bones implanted in non-radiocontaminated mice 177

ANALYSIS, RISK
Biologically motivated models for chemical risk assessment S129
Fitting a model to categorical response data with application to species extrapolation of toxicity S405
Inhalation reference dose (RfD_i): an application of interspecies dosimetry modeling for risk assessment of insoluble particles S177
Interspecies scaling for cancer risk assessment S403
Recent developments in carcinogenic risk assessment S313
Risk considerations related to lung modeling S283
Scaling of fetal cancer risks from laboratory animals to man S419
Time-related factors in the study of risks in animals and humans S379

ANNUAL LIMIT ON INTAKE
Limiting values of radionuclide intake and air concentration and dose conversion factors for inhalation, submersion, and ingestion 630
The use of animal experiments for assessing annual limits on intake and interpreting chest-monitoring data for workers exposed to industrial actinide-bearing dusts S221

ATOMIC BOMB
Europium-152 activity induced by Hiroshima atomic bomb neutrons: Comparison with the ^{32}P, ^{60}Co and ^{152}Eu activities in Dosimetry System 1986 (DS86) 831
Fallout in the hypocenter area of the Hiroshima atomic bomb 1013
Supra-linear dose-response in the A-bomb study 1037

ATOMIC BOMB SURVIVORS
Comment to Dr. Delpla's 'Let us come back to radiation hormesis' 205
Dose-response analyses for the Japanese A-bomb survivors 1035
Let us come back to 'radiation hormesis' 203
Thermoluminescence dosimetry of gamma rays from the Hiroshima atomic bomb at distances 1.91-2.05 km from the hypocenter 1003

BACTERIA
Bioaccumulation and chemical modification of Tc by soil → bacteria 239

BIOACCUMULATION FACTOR
Bioconcentration of fallout ^{137}Cs by fungi and red-backed voles (Clethrionomys gapperi) 959

BIOASSAY
Determination of U in urine: comparison of ICP-mass spectrometry and delayed neutron assay 171
Health physics annotated bibliography 790
The importance of acid digestion of urine prior to spontaneous deposition of ^{210}Po 615
Three example applications of optimization techniques to Department of Energy contractor radiation protection programs 873

BIOKINETICS
Measurements of Cs-absorption and retention in man 571

BLOOD
A sensitive method for the determination of Th in body fluids 393

BONE IMPLANTS
The effect of Zn-DPTA treatment on ^{241}Am removal from bones implanted in non-radiocontaminated mice 177

BONES, HUMAN
Tetracycline in uranyl nitrate intoxication: its action on renal damage and U retention in bone 403

BRACHYTHERAPY
Nursing personnel taking care of brachytherapy patients: To be or not to be classified as radiation workers? 199

BREMSSTRAHLUNG
Estimation of absorbed dose due to gas bremsstrahlung from electron storage rings 407

Ca-DTPA
Predicting the kinetics of chelating agents in man from animal data S165

CALCIUM
Daily intake of 11 elements in relation to Reference Japanese Man 551

CALIBRATION
Determination of photon conversion factors relating exposure and dose for several extremity phantom designs 733
Half-life of ^{99m}Tc in linearity testing of radionuclide calibrators 673
Performance of a well counter and a dose calibrator for quantitative positron emission tomography 623
Routine calibration of automatic exposure control systems for diagnostic x-ray machines: a 5-y progress report 1021
Three example applications of optimization techniques to Department of Energy contractor radiation protection programs 873

CANCER
A survey of winter, summer and annual average ^{222}Rn concentrations in family dwellings 465
Abnormal concentration of U in many brands of South American cigarette tobacco 844
Bias in United States U miners' exposure data 169
Dose-response analyses for the Japanese A-bomb survivors 1035
Estimating Rn-induced lung cancer in the United States 417
Expected indoor ^{222}Rn levels in counties with very high and very low lung cancer rates 897
HUMTRN and effects: Age and sex specific dosimetric and physiological human population dynamics models for dose assessment S443
Interspecies scaling for cancer risk assessment S403
Lung cancer risk from indoor radon exposures to radon daughters 218
Mortality of Hanford workers 839
Reply to "Leukemia from Ra: 'Data gaps' or 'scientific evidence'" 492
Reply to radiation cancer risk series 841
Risk considerations related to lung modeling S283
Risks of radioactive material transportation accidents in Oregon 131
Scaling of fetal cancer risks from laboratory animals to man S419
Supra-linear dose-response in the A-bomb study 1037

CARBON, ACTIVATED
An activated charcoal-based, liquid scintillation-analyzed airborne Rn detector 43

CARBON-14
Lung retention and clearance classification of a ^{14}C-containing aerosol produced during re-tubing of a nuclear reactor 645

CARBON-14 (CONTINUED)
Choice of dose measure for extrapolating carcinogenic risk from animals to humans: An empirical investigation of 23 chemicals S387
Comparative carcinogenicity of ionizing radiation and chemicals 926
Dose paradigms for inhaled vapors of primary carcinogens and their impact on risk assessment S333
Low-level effects of low linear-energy-transfer ionizing radiation on leukocarcinogenesis in mice S327
Pathways from cell transformation to carcinogenesis S341
Radiation and cutaneous neoplasms 206
Recent developments in carcinogenic risk assessment S313

CESIUM
Chernobyl radioactivity in Turkish tea: a response 495
Isotopic composition of high-activity particles released in the Chernobyl accident 707
Measurements of Cs-absorption and retention in man 571

CESIUM-134
Chernobyl-derived ^{137}Cs and ^{134}Cs in heather plants in Northwest England 485
Measurements of whole-body radiocesium at the Harwell Laboratory, 1976-1988 995
Seasonal variation of soil-to-plant transfer of K and fallout $^{134,137}Cs$ in peatland vegetation 593

CESIUM-137
Bioconcentration of fallout ^{137}Cs by fungi and red-backed voles (Clethrionomys gapperi)
Cesium-137 in Montana soils 955
Cesium-137 urinary excretion by northeastern (Pordenone) Italian people following the Chernobyl nuclear accident 99
Chernobyl-derived ^{137}Cs and ^{134}Cs in heather plants in Northwest England 485
Effect of redox potential on fixation of ^{137}Cs in lake sediment 781
Environmental radioactivity levels in marine species from Malaysia and Fiji 187
Experimental determination of transfer coefficients of ^{137}Cs and ^{131}I from fodder into milk of cows and sheep after the Chernobyl accident 967
Fallout in the hypocenter area of the Hiroshima atomic bomb 1013
Measurements of whole-body radiocesium at the Harwell Laboratory, 1976-1988 995
Reassessment of ^{137}Cs in soils from Chernobyl fallout 494
Reply to comments on ^{137}Cs in soils from Chernobyl fallout 494
Seasonal variation of soil-to-plant transfer of K and fallout $^{134,137}Cs$ in peatland vegetation 593

CESIUM-137 (CONTINUED)
Transfer of ^{137}Cs to milk and meat in Hungary from Chernobyl fallout with comparisons of worldwide fallout in the 1960s 587
Uncertainty in predictions of fallout radionuclides in foods and of subsequent ingestion 943

CHARCOAL FILTERS
A charcoal coil measurement system for environmental ^{222}Rn 801

CHELATION
Predicting the kinetics of chelating agents in man from animal data S165

CHEMICAL TOXICITY
Comparative carcinogenicity of ionizing radiation and chemicals 926
The behavior and chemical toxicity of U in the kidney: a reassessment 365

CHEMOTHERAPY
A stochastic model of the acquisition of drug resistance during antineoplastic chemotherapy S349

CHERNOBYL
Biological retention of fission products from the Chernobyl plume 649
Cesium-137 urinary excretion by northeastern (Pordenone) Italian people following the Chernobyl nuclear accident 99
Chernobyl radioactivity in a Turkish tea drinker 1017
Chernobyl radioactivity in Turkish tea: A response 495
Chernobyl source term, atmospheric dispersion, and dose estimation 697
Chernobyl-derived ^{137}Cs and ^{134}Cs in heather plants in Northwest England 485
Comments on internal dose resulting form drinking Turkish tea harvested in 1986 205
Decrease in ovine milk radiocesium following removal of sheep from a contaminated pasture 183
Effects of bentonite on transfer of radionuclides from forage to milk 181
Experimental determination of transfer coefficients of ^{137}Cs and ^{131}I from fodder into milk of cows and sheep after the Chernobyl accident 967
Final warning: the legacy of Chernobyl 218
Isolation and characterization of hot particles from Chernobyl fallout in southwestern Finland 975
Isotopic composition of high-activity particles released in the Chernobyl accident 707
Measurements of Cs-absorption and retention in man 571
Measurements of whole-body radiocesium at the Harwell Laboratory, 1976-1988 995

CHERNOBYL (CONTINUED)
Reassessment of ^{137}Cs in soils from Chernobyl fallout 494
Reply to comments on ^{137}Cs in soils from Chernobyl fallout 494
Transfer of ^{137}Cs to milk and meat in Hungary from Chernobyl fallout with comparisons of worldwide fallout in the 1960s 587
Transfer of radiocesium from different environmental sources to ewes and suckling lambs 579

CHINA, REPUBLIC OF
Body K and ^{40}K in Chinese subjects measured with a whole-body counter 743

CHROMOSOME ABERRATION
Effect of heterogenity of human population in cell radiosensitivity on the extrapolation of dose-response relationships to low doses 385
Factors affecting the neoplastic response of mice exposed to radiations of different qualities S329

CIGARETTES
Abnormal concentration of U in many brands of South American cigarette tobacco 844
Estimating Rn-induced lung cancer in the United States 417

COAL
Assessment of radiological emissions from Spanish coal power plants: radioactive releases and associated risks 765

COBALT-60
Europium-152 activity induced by Hiroshima atomic bomb neutrons: comparison with the ^{32}P, ^{60}Co and ^{152}Eu activities in Dosimetry System 1986 (DS86) 831
Mutant frequency of radiotherapy technicians appears to be associated with recent dose of ionizing radiation 537

COMPLEXATION
Reaction mechanisms responsible for transformation of pertechnetate in photoautotrophic organisms 255

COMPUTER CALCULATIONS
Sensitivity of effective radiating area measurement for therapeutic ultrasound transducers to variations in hydrophone scanning technique 637

COMPUTERS
A resource facility for kinetic analysis: Modeling using the SAAM computer programs S457
HUMTRN and effects: Age and sex specific dosimetric and physiological human population dynamics models for dose assessment S443
The ORNL/ICRP system of computer codes for dose estimation S455

CONDUCTIVITY, RADIATION-INDUCED
A Compton current radiation dosimeter 1009

CONTAMINATION
Cross contamination between alpha-track detectors 163
Predicting the nuclide fraction transferred to consumption through grain foods 601

CONTAMINATION, ENVIRONMENTAL
Decrease in ovine milk radiocesium following removal of sheep from a contaminated pasture 183
Experimental measurement of angular dependency of external dose from 40-keV x-ray photons 809
Impact of correlations on stochastic estimates of soil contamination and plant uptake 653
Results of a cleanup and treatment test at the Nevada Test Site: Evaluation of vacuum removal of Pu-contaminated soil 771

CONTAMINATION, INTERNAL
The effect of Zn-DPTA treatment on ^{241}Am removal from bones implanted in non-radiocontaminated mice 177

COST-BENEFIT ANALYSIS
Three example applications of optimization techniques to Department of Energy contractor radiation protection programs 873

COUNTING EFFICIENCY
A multi-element proportional counter for radiation protection measurements 631
Improved counting efficiencies for measuring ^{239}Pu in the lung in the sitting position 747
Performance of a well counter and a dose calibrator for quantitative positron emission tomography 623

CURIUM
A biokinetic model of inhaled Cm compounds in dogs: application to human exposure data S187

DE MINIMIS REGULATIONS
Comments on various views on the concept of 'de minimis' 211

DECONTAMINATION
Destruction of genotoxic wastes mixed with radioactive products 885
Effects of bentonite on transfer of radionuclides from forage to milk 181
Results of a cleanup and treatment test at the Nevada Test Site: evaluation of vacuum removal of Pu-contaminated soil 771

DETECTOR, ALPHA TRACK
Cross contamination between alpha-track detectors 163

DETECTOR, DIELECTRIC TRACK
A Compton current radiation dosimeter 1009

DETECTOR, FISSION TRACK
Uranium assay in milk and drug samples using solid-state track detectors 985

DETECTOR, GERMANIUM
Improved counting efficiencies for measuring ^{239}Pu in the lung in the sitting position 747

DETECTOR, PHOSWICH
Improved counting efficiencies for measuring ^{239}Pu in the lung in the sitting position 747

DETECTOR, RADIATION
A multi-element proportional counter for radiation protection measurements 631
An activated charcoal-based, liquid scintillation-analyzed airborne Rn detector 43
An inexpensive miniaturized linear CdTe detector array system 825
Beta skin dose determination using TLDs, Monte-Carlo calculations, and extrapolation chamber 917
Determining the charged fractions of ^{218}Po and ^{214}Pb using an environmental gamma-ray and Rn detector 51
Protocol for indoor ^{222}Rn measurements: a reply 843

DIAGNOSTIC RADIOLOGY
Protocols for the radiation safety surveys of diagnostic radiologic equipment, report #25 216
Routine calibration of automatic exposure control systems for diagnostic x-ray machines: a 5-y progress report 1021

DISCHARGE LIMITS
Radiation Protection No. 42, methods used for fixing discharge limits for radioactive effluents from nuclear installations in the Member States: a review and analysis 1045

DNA
Analyzing the role of biochemical processes in determining response to ionizing radiations S369
The molecular basis of stochastic and nonstochastic effects S343
Use of adducts to hemoglobin and DNA as molecular dosimeters S245

DOGS
A biokinetic model of inhaled Cm compounds in dogs: application to human exposure data S187
A model for scaling the results of U excretion rate studies in beagle dogs to man S199
Biomathematical modeling of ^{239}Pu retention, skeletal label kinetics, and local dosimetry in dogs S243

DOGS (CONTINUED)
Is the beagle dog an appropriate experimental animal for extrapolating data to humans on organ distribution patterns of U, Th, and Pu? S91
Reassessment of human and beagle dog Pu excretion data based on reevaluation of human Pu excretion data S211
Scaling of fetal cancer risks from laboratory animals to man S419

DOSE
A code to investigate complex metabolic models for dose calculation S435
A method for comparison of animal and human alveolar dose and toxic effect of inhaled ozone S37
Serial allometric factor extrapolation: Compartmental and physiological pharmacokinetic approaches S395
The ORNL/ICRP system of computer codes for dose estimation S455

DOSE EQUIVALENT
A multi-element proportional counter for radiation protection measurements 631
Estimation of the effective dose equivalent (H_E) for neutron irradiation 210
On the unit of dose equivalent and the linear hypothesis 495

DOSE, ABSORBED
Application of lung deposition models to nonradioactive substances S309
Comparative dosimetry of $^{124}Te(p,2n)^{123}I$ and $^{124}Xe(p,2n)^{123}I$ 195
Estimation of absorbed dose due to gas bremsstrahlung from electron storage rings 407

DOSE, EXTERNAL
Experimental measurement of angular dependency of external dose from 40-keV x-ray photons 809

DOSE, ORGAN
Correlation of lung dose with Rn concentration, potential alpha-energy concentration and daughter surface deposition: A Monte Carlo analysis 429
Relationship between kidney burden and radiation dose from chronic ingestion of U: Implications for radiation standards for the public 9

DOSE, POPULATION
Effect of heterogenity of human population in cell radiosensitivity on the extrapolation of dose-response relationships to low doses 385
HUMTRN and effects: Age and sex specific dosimetric and physiological human population dynamics models for dose assessment S443
Population exposure from nuclear medicine procedures: measurement data 725
Radium-226 content of beverages 761

DOSE, SCATTERED
Scattered radiation determination in medical x-ray shielding computations 669
Scattered radiation levels from a portable fluoroscopic/angiographic unit 817
Some remarks on secondary protyective barrier calculation for radiographic installations: NCRP report no. 49 revisited 1025

DOSE, SKIN
Beta skin dose determination using TLDs, Monte-Carlo calculations, and extrapolation chamber 917

DOSIMETRY
A resource facility for kinetic analysis: Modeling using the SAAM computer programs S457
Aerosol deposition in the nose as a function of body size S299
Age-related scaling for aerosol and vapor deposition in the upper airways of humans S293
An overexposure in industrial radiography using an ^{192}Ir radionuclide 117
Analyzing the role of biochemical processes in determining response to ionizing radiations S369
Biologically motivated models for chemical risk assessment S129
Biomathematical modeling of ^{239}Pu retention, skeletal label kinetics, and local dosimetry in dogs S243
Comparative dosimetry of $^{124}Te(p,2n)^{123}I$ and $^{124}Xe(p,2n)^{123}I$ 195
Dietary intake of stable I and some aspects of radioiodine dosimetry 471
Dosimetry to lung from inhaled pollutants S307
Europium-152 activity induced by Hiroshima atomic bomb neutrons: comparison with the ^{32}P, ^{60}Co and ^{152}Eu activities in Dosimetry System 1986 (DS86) 831
Factors affecting the neoplastic response of mice exposed to radiations of different qualities S329
Human respiratory tract model for radiological protection: A revision of the ICRP dosimetric model for the respiratory system S249
ICRU report 44 988
Inhalation reference dose (RfD_i): an application of interspecies dosimetry modeling for risk assessment of insoluble particles S177
Low-level effects of low linear-energy-transfer ionizing radiation on leukocarcinogenesis in mice S327
Lung clearance modeling on the basis of physiological and biological parameters S255
Mathematical models of cell survival after ionizing radiation: application to radiotherapy planning S355
Modeling for scaling to man: biology, dosimetry, and response S1
Nuclear accident dosimetry intercomparison studies 439

DOSIMETRY (CONTINUED)
Overview of NCRP Task Group activities on respiratory tract dosimetry modeling S291
Pharmacokinetic parameters for interspecies scaling using allometric techniques S159
Physiological pharmacokinetic model of hexachlorobenzene in the rat S139
Physiologically based pharmacokinetic modeling of noninvasive transcutaneous chemical dosimetry S157
Predictions of ozone absorption in human lungs from newborn to adult S29
Protocol for indoor ^{222}Rn measurements 842
The current approach of the ICRP Task Group for modeling doses to respiratory tract tissues S271
The molecular basis of stochastic and nonstochastic effects S343
The use of animal experiments for assessing annual limits on intake and interpreting chest-monitoring data for workers exposed to industrial actinide-bearing dusts S221
Use of adducts to hemoglobin and DNA as molecular dosimeters S245

DOSIMETRY, GAMMA
Nuclear accident dosimetry intercomparison studies 439

DOSIMETRY, INTERNAL
Comments on internal dose resulting form drinking Turkish tea harvested in 1986 205

DOSIMETRY, PERSONNEL
Need for international forum on space personnel dosimetry 839
Results of 10 y of radiation protection dosimetry at the neutrontherapy facility at Louvain-la-Neuve 529
Summary statements from the Second Conference on Radiation Protection and Dosimetry 461

DOSIMETRY, SOLID-STATE
A Compton current radiation dosimeter 1009

DOSIMETRY, THERMOLUMINESCENT
Beta skin dose determination using TLDs, Monte-Carlo calculations, and extrapolation chamber 917
Determination of photon conversion factors relating exposure and dose for several extremity phantom designs 733

DS86
Supra-linear dose-response in the A-bomb study 1037
Thermoluminescence dosimetry of gamma rays from the Hiroshima atomic bomb at distances 1.91-2.05 km from the hypocenter 1003

EDITORIAL
New faces in Health Physics 1
Scope of manuscripts in Health Physics 207

HUMAN ORGANS
Experimental measurement of angular dependency of external dose from 40-keV x-ray photons 809
Is the beagle dog an appropriate experimental animal for extrapolating data to humans on organ distribution patterns of U, Th, and Pu? S91
The postnatal growth of ICRP target organs in reference humans: spleen and liver 927

HUMANS
A Bayesian methodology for scaling radiation studies from animals to man S411
A model for scaling the results of U excretion rate studies in beagle dogs to man S199
Age-related scaling for aerosol and vapor deposition in the upper airways of humans S293
Assessment of dose to man from releases of ^{99}Tc in fresh water systems 337
Choice of dose measure for extrapolating carcinogenic risk from animals to humans: an empirical investigation of 23 chemicals S387
Comparative skeletal distribution of Am and Pu in man, monkey, and baboon S81
Estimation of human gonadal Pu and Ce concentrations from animal data S97
Flow distribution in human and canine tracheobronchial airway casts S21
Human respiratory tract model for radiological protection: A revision of the ICRP dosimetric model for the respiratory system S249
Modeling for scaling to humans: Time to get serious S13
Ordering of metal-ion toxicities in different species-extrapolation to man S115
Predicting the kinetics of chelating agents in man from animal data S165
Retention patterns for inhaled particles in the lung: comparisons between laboratory animals and humans for chronic exposures S69
RF currents induced in an anatomically-based model of a human for plane-wave exposures (20-100 MHz) 89
Sensitivity testing of an age-related, multicompartment dosimetric model for bone-surface-seeking radionuclides in man S229
Toxicity of ^{99}Tc: Can it represent a risk to man? 345
Uranium in the tissues of an occupationally exposed individual 17

INCINERATION
Incineration and monitoring of low-level ^{35}S wastes at a biological research institution 191

INDIA
Uranium assay in milk and drug samples using solid-state track detectors 985

INDUCED CURRENTS
RF currents induced in an anatomically-based model of a human for plane-wave exposures (20-100 MHz) 89

INGESTION
A physiologically based model of 1-nitropyrene metabolism after inhalation or ingestion S149
Fallout ^{3}H in human tissue at Akita, Japan 559
Further study on fallout ^{3}H ingestion in Akita, Japan 565
Uncertainty in predictions of fallout radionuclides in foods and of subsequent ingestion 943

INHALATION
A biokinetic model of inhaled Cm compounds in dogs: application to human exposure data S187
A model for scaling the results of U excretion rate studies in beagle dogs to man S199
A physiologically based model of 1-nitropyrene metabolism after inhalation or ingestion S149
Aerosol deposition in the nose as a function of body size S299
Age-related scaling for aerosol and vapor deposition in the upper airways of humans S293
Application of lung deposition models to nonradioactive substances S309
Comparative toxicology of inhaled $^{239}PuO_2$ in dogs and rats S331
Dosimetric principles for extrapolating results of rat inhalation studies to humans, using an inhaled Ni compound as an example S213
Dosimetry to lung from inhaled pollutants S307
Flow distribution in human and canine tracheobronchial airway casts S21
Inhalation reference dose (RfD_i): an application of interspecies dosimetry modeling for risk assessment of insoluble particles S177
Limiting values of radionuclide intake and air concentration and dose conversion factors for inhalation, submersion, and ingestion 630
Lung clearance modeling on the basis of physiological and biological parameters S255
Lung retention and clearance classification of a ^{14}C-containing aerosol produced during re-tubing of a nuclear reactor 645
Modeling accumulations of particles in lung during chronic inhalation exposures that lead to impaired clearance S61

INHALATION (CONTINUED)
Modeling the influence of age at exposure and species on the fate of inhaled $^{241}AmO_2$ S185
Overview of NCRP Task Group activities on respiratory tract dosimetry modeling S291
Retention patterns for inhaled particles in the lung: Comparisons between laboratory animals and humans for chronic exposures S69
Scaling of fetal cancer risks from laboratory animals to man S419
The use of animal experiments for assessing annual limits on intake and interpreting chest-monitoring data for workers exposed to industrial actinide-bearing dusts S221

INSTRUMENTATION
An inexpensive miniaturized linear CdTe detector array system 825

INSTRUMENTS
Evaluation of MDA instant working level meters 61
The 1989 Radon Industry Directory 499

INTAKE
Dietary intake of stable I and some aspects of radioiodine dosimetry 471

INTERNATIONAL COMMISSION ON RADIOLOGICAL PROTECTION
A comparison of excretion and retention between the current ICRP lung model and a proposed new model S263
Human respiratory tract model for radiological protection: A revision of the ICRP dosimetric model for the respiratory system S249
Lung cancer risk from indoor radon exposures to radon daughters 218
The current approach of the ICRP Task Group for modeling doses to respiratory tract tissues S271
The postnatal growth of ICRP target organs in reference humans: spleen and liver 927

INTERNATIONAL RADIATION PROTECTION ASSOCIATION
Twenty-third Annual Congress of Japan Health Physics Society 501

INTERNATIONAL SYSTEM OF UNITS
Summary statements from the Second Conference on Radiation Protection and Dosimetry 461
The advantages and simplifications of SI units in health physics 149

IODINE
Dietary intake of stable I and some aspects of radioiodine dosimetry 471
Comparative dosimetry of $^{124}Te(p,2n)^{123}I$ and $^{124}Xe(p,2n)^{123}I$ 195

IODINE-131
Experimental determination of transfer coefficients of ^{137}Cs and ^{131}I from fodder into milk of cows and sheep after the Chernobyl accident 967
Uncertainty in predictions of fallout radionuclides in goods and of subsequent ingestion 943

IRIDIUM-192
An overexposure in industrial radiography using an ^{192}Ir radionuclide 117

ITALY
Cesium-137 urinary excretion by northeastern (Pordenone) Italian people following the Chernobyl nuclear accident 99

JAPAN
Daily intake of 11 elements in relation to Reference Japanese Man 551
Fallout ^{3}H in human tissue at Akita, Japan 559
Further study on fallout ^{3}H ingestion in Akita, Japan 565

KIDNEY
The behavior and chemical toxicity of U in the kidney: A reassessment 365

KINETICS
Kinetic model of the distribution of ^{239}Pu in the beagle skeleton 449

LACTATION
Uranium assay in milk and drug samples using solid-state track detectors 985

LEAD-214
Determining the charged fractions of ^{218}Po and ^{214}Pb using an environmental gamma-ray and Rn detector 51

LEUKEMIA
Leukemia from Ra: 'Data gaps' or 'scientific evidence'? 491

LINEAL ENERGY
Lineal energy distributions and effective quality factor for ^{35}S beta particles 659

LIQUID SCINTILLATION
An activated charcoal-based, liquid scintillation-analyzed airborne Rn detector 43

LITIGATION
Microwave cataract and litigation: A case study 545

LUNGS, HUMAN
Improved counting efficiencies for measuring ^{239}Pu in the lung in the sitting position 747
A comparison of excretion and retention between the current ICRP lung model and a proposed new model S263

LUNGS, HUMAN (CONTINUED)
Age-related scaling for aerosol and vapor deposition in the upper airways of humans S293
Application of lung deposition models to nonradioactive substances S309
Dosimetry to lung from inhaled pollutants S307
Flow distribution in human and canine tracheobronchial airway casts S21
Human subject age and activity level: factors addressed in a biomathematical deposition program for extrapolation modeling S49
Lung clearance modeling on the basis of physiological and biological parameters S255
Modeling accumulations of particles in lung during chronic inhalation exposures that lead to impaired clearance S61
Predictions of ozone absorption in human lungs from newborn to adult S29
Risk considerations related to lung modeling S283
Structural differences between human and rat lungs: implications for Monte Carlo modeling of aerosol deposition S41

LUNGS, RODENT
Comparative toxicology of inhaled $^{239}PuO_2$ in dogs and rats S331
Dosimetric principles for extrapolating results of rat inhalation studies to humans, using an inhaled Ni compound as an example S213
Lung retention and clearance classification of a ^{14}C-containing aerosol produced during re-tubing of a nuclear reactor 645
Structural differences between human and rat lungs: Implications for Monte Carlo modeling of aerosol deposition S41

MAXIMUM PERMISSIBLE CONCENTRATIONS
Limiting values of radionuclide intake and air concentration and dose conversion factors for inhalation, submersion, and ingestion 630
Safety limits for the release of short-lived radionuclides 492

MEDICAL RADIATION
Occupational doses in radiation oncology in Manitoba--1980 to 1986 521
Scattered radiation determination in medical x-ray shielding computations 669

METABOLISM
A code to investigate complex metabolic models for dose calculation S435
A physiologically based model of 1-nitropyrene metabolism after inhalation or ingestion S149

METABOLISM (CONTINUED)
Biological retention of fission products from the Chernobyl plume 649
Comparative metabolic behavior and interrelationships of Tc and S in soybean plants 281
Physiologically based pharmacokinetic modeling of noninvasive transcutaneous chemical dosimetry S157
Technetium absorption and turnover in monogastric and polygastric animals 315
Technetium metabolism by lactating goats 321
Technetium metabolism in goats and swine 331

MICRODOSIMETRY
Lineal energy distributions and effective quality factor for ^{35}S beta particles 659

MICROWAVE
Microwave cataract and litigation: A case study 545

MINING, URANIUM
Bias in United States U miners' exposure data 169
Comments on Bigu's 'Relationship of ^{220}Rn and ^{222}Rn progeny levels in Canadian underground U mines' 210
Radioactivity and health: A history 1002

MODELING, BIOLOGICAL FACTORS
A method for comparison of animal and human alveolar dose and toxic effect of inhaled ozone S37
Comparative skeletal distribution of Am and Pu in man, monkey, and baboon S81
Estimation of human gonadal Pu and Ce concentrations from animal data S97
Factors affecting the placental transfer of actinides S109
Flow distribution in human and canine tracheobronchial airway casts S21
Human subject age and activity level: factors addressed in a biomathematical deposition program for extrapolation modeling S49
Is the beagle dog an appropriate experimental animal for extrapolating data to humans on organ distribution patterns of U, Th, and Pu? S91
Long-term availability of Tc deposited on soil after accidental releases 247
Modeling accumulations of particles in lung during chronic inhalation exposures that lead to impaired clearance S61
Modeling for scaling to humans: time to get serious S13
Multiparameter extrapolation of biodistribution data between species S121
Ordering of metal-ion toxicities in different species-extrapolation to man S115
Predictions of ozone absorption in human lungs from newborn to adult S29

RADIOACTIVITY, REMOVAL OF
Design and evaluation of a cart for the collection and segregation of low-level radioactive waste 993
Destruction of genotoxic wastes mixed with radioactive products 885
Effects of bentonite on transfer of radionuclides from forage to milk 181
Results of a cleanup and treatment test at the Nevada Test Site: Evaluation of vacuum removal of Pu-contaminated soil 771

RADIOCESIUM
Chernobyl radioactivity in a Turkish tea drinker 1017
Decrease in ovine milk radiocesium following removal of sheep from a contaminated pasture 183
Transfer of radiocesium from different environmental sources to ewes and suckling lambs 579

RADIOFREQUENCY
RF currents induced in an anatomically-based model of a human for plane-wave exposures (20-100 MHz) 89

RADIOGRAPHY
Routine calibration of automatic exposure control systems for diagnostic x-ray machines: a 5-y progress report 1021

RADIONUCLIDES
A code to investigate complex metabolic models for dose calculation S435
Environmental radioactivity levels in marine species from Malaysia and Fiji 187
Gastrointestinal absorption of selected radionuclides 499
Radionuclide contents in building materials used in Hong Kong 397

RADIOPHARMACEUTICALS
Population exposure from nuclear medicine procedures: measurement data 725

RADIOSENSITIVITY
Effect of heterogenity of human population in cell radiosensitivity on the extrapolation of dose-response relationships to low doses 385

RADIOTHERAPY
Mathematical models of cell survival after ionizing radiation: application to radiotherapy planning S355

RADIUM
A Bayesian methodology for scaling radiation studies from animals to man S411
Evidence of exhalation of stored environmental Rn determined by whole-body counting 161
Leukemia from Ra: 'data gaps' or 'scientific evidence'? 491

MODELS (CONTINUED)
Low-level effects of low linear-energy-transfer ionizing radiation on leukocarcinogenesis in mice S327
Lung clearance modeling on the basis of physiological and biological parameters S255
Mathematical models of cell survival after ionizing radiation: application to radiotherapy planning S355
Modeling for scaling to humans: time to get serious S13
Modeling for scaling to man: biology, dosimetry, and response S1
Modeling the influence of age at exposure and species on the fate of inhaled $^{241}AmO_2$ S185
Overview of NCRP Task Group activities on respiratory tract dosimetry modeling S291
Pathways from cell transformation to carcinogenesis S341
Pharmacokinetic parameters for interspecies scaling using allometric techniques S159
Physiological pharmacokinetic model of hexachlorobenzene in the rat S139
Physiologically based pharmacokinetic modeling of noninvasive transcutaneous chemical dosimetry S157
Recent developments in carcinogenic risk assessment S313
Risk considerations related to lung modeling S283
Serial allometric factor extrapolation: Compartmental and physiological pharmacokinetic approaches S395
The current approach of the ICRP Task Group for modeling doses to respiratory tract tissues S271
The molecular basis of stochastic and nonstochastic effects S343
The ORNL/ICRP system of computer codes for dose estimation S455
The postnatal growth of ICRP target organs in reference humans: Spleen and liver 927
Time-related factors in the study of risks in animals and humans S379
Use of adducts to hemoglobin and DNA as molecular dosimeters S245

MONITORING, ENVIRONMENTAL
A charcoal coil measurement system for environmental ^{222}Rn 801
Three example applications of optimization techniques to Department of Energy contractor radiation protection programs 873

MONITORING, PERSONNEL
Personal radiation monitoring services in Kenya 477

MONTE CARLO
Beta skin dose determination using TLDs, Monte-Carlo calculations, and extrapolation chamber 917
Correlation of lung dose with Rn concentration, potential alpha-energy concentration and daughter surface deposition: A Monte Carlo analysis 429

MONTE CARLO (CONTINUED)
Structural differences between human and rat lungs: implications for Monte Carlo modeling of aerosol deposition S41
Uncertainty in predictions of fallout radionuclides in foods and of subsequent ingestion 943

MORTALITY
HUMTRN and effects: Age and sex specific dosimetric and physiological human population dynamics models for dose assessment S443
Mortality of Hanford workers 839
Mortality of Hanford workers: a reply 841

NAGASAKI
Comment to Dr. Delpla's 'Let us come back to radiation hormesis' 205
Let us come back to 'radiation hormesis' 203

NATIONAL COUNCIL ON RADIATION PROTECTION AND MEASUREMENTS
Comparative carcinogenicity of ionizing radiation and chemicals 926
Overview of NCRP Task Group activities on respiratory tract dosimetry modeling S291

NEOPLASMS
A stochastic model of the acquisition of drug resistance during antineoplastic chemotherapy S349
Factors affecting the neoplastic response of mice exposed to radiations of different qualities S329
Mathematical models of cell survival after ionizing radiation: application to radiotherapy planning S355
Radiation and cutaneous neoplasms 206
Reassessment of human and beagle dog Pu excretion data based on reevaluation of human Pu excretion data S211

NEPHRON
The behavior and chemical toxicity of U in the kidney: A reassessment 365

NEUTRONS
Cosmic-ray neutron albedo dose in low-earth orbits 665
Estimation of the effective dose equivalent (H_E) for neutron irradiation 210
Europium-152 activity induced by Hiroshima atomic bomb neutrons: comparison with the ^{32}P, ^{60}Co and ^{152}Eu activities in Dosimetry System 1986 (DS86) 831
Nuclear accident dosimetry intercomparison studies 439
Results of 10 y of radiation protection dosimetry at the neutrontherapy facility at Louvain-la-Neuve 529
Studies of the neutron transport and shielding properties of locally developed shielding material: poly-boron 819
Summary statements from the Second Conference on Radiation Protection and Dosimetry 461

NEVADA TEST SITE
Results of a cleanup and treatment test at the Nevada Test Site: Evaluation of vacuum removal of Pu-contaminated soil 771

NICKEL
Dosimetric principles for extrapolating results of rat inhalation studies to humans, using an inhaled Ni compound as an example S213

NUCLEAR FUEL CYCLE
Population exposure from the nuclear fuel cycle 217

NUCLEAR MEDICINE
Half-life of ^{99m}Tc in linearity testing of radionuclide calibrators 673
Nuclear analytical techniques in medicine 215
Nursing personnel taking care of brachytherapy patients: To be or not to be classified as radiation workers? 199
Performance of a well counter and a dose calibrator for quantitative positron emission tomography 623
Population exposure from nuclear medicine procedures: measurement data 725

NUCLEAR REACTOR
Lung retention and clearance classification of a ^{14}C-containing aerosol produced during re-tubing of a nuclear reactor 645
Radiological protection criteria for the recycling of materials from the dismantling of nuclear installations 622

NUCLEAR WAR
Crimes of official science: a case book 215
Military radiobiology 499
Nuclear fear: A history of images 216

NUCLEAR WORKERS
Distribution of ^{239}Pu in occupationally exposed workers, based on radiochemical analyses of three whole bodies S89
Implications of nuclear safety requirements for the protection of workers in nuclear facilities 500
Microwave cataract and litigation: A case study 545
Mortality of Hanford workers: A reply 841
Nursing personnel taking care of brachytherapy patients: To be or not to be classified as radiation workers? 199
The use of animal experiments for assessing annual limits on intake and interpreting chest-monitoring data for workers exposed to industrial actinide-bearing dusts S221
Use of a simulation model in occupational dose assessment at a high-level radioactive waste repository 107

OZONE
A method for comparison of animal and human alveolar dose and toxic effect of inhaled ozone S37
Predictions of ozone absorption in human lungs from newborn to adult S29

PEER REVIEW
Reply to radiation cancer risk series 841

PERTECHNETATE
Bioaccumulation and chemical modification of Tc by soil bacteria 239
Comparative metabolic behavior and interrelationships of Tc and S in soybean plants 281
Reaction mechanisms responsible for transformation of pertechnetate in photoautotrophic organisms 255
Technetium absorption and turnover in monogastric and polygastric animals 315
Technetium metabolism in goats and swine 331
The uptake of TcO_4^- by plants: A mathematical description 309

PHANTOM
Determination of photon conversion factors relating exposure and dose for several extremity phantom designs 733

PHARMACOKINETICS
A biokinetic model of inhaled Cm compounds in dogs: application to human exposure data S187
A physiologically based model of 1-nitropyrene metabolism after inhalation or ingestion S149
A resource facility for kinetic analysis: Modeling using the SAAM computer programs S457
Biologically motivated models for chemical risk assessment S129
Biomathematical modeling of ^{239}Pu retention, skeletal label kinetics, and local dosimetry in dogs S243
Dosimetric principles for extrapolating results of rat inhalation studies to humans, using an inhaled Ni compound as an example S213
Inhalation reference dose (RfD_i): an application of interspecies dosimetry modeling for risk assessment of insoluble particles S177
Modeling the influence of age at exposure and species on the fate of inhaled $^{241}AmO_2$ S185
Pharmacokinetic parameters for interspecies scaling using allometric techniques S159
Physiological pharmacokinetic model of hexachlorobenzene in the rat S139
Physiologically based pharmacokinetic modeling of noninvasive transcutaneous chemical dosimetry S157
Predicting the kinetics of chelating agents in man from animal data S165

PHARMACOKINETICS (CONTINUED)
Recent developments in carcinogenic risk assessment S313
Sensitivity testing of an age-related, multicompartment dosimetric model for bone-surface-seeking radionuclides in man S229
Serial allometric factor extrapolation: Compartmental and physiological pharmacokinetic approaches S395
The use of animal experiments for assessing annual limits on intake and interpreting chest-monitoring data for workers exposed to industrial actinide-bearing dusts S221
Use of adducts to hemoglobin and DNA as molecular dosimeters S245

PHOSPHOROUS-32
Europium-152 activity induced by Hiroshima atomic bomb neutrons: comparison with the ^{32}P, ^{60}Co and ^{152}Eu activities in Dosimetry System 1986 (DS86) 831

PHOTONS
Experimental measurement of angular dependency of external dose from 40-keV x-ray photons 809
Nuclear analytical techniques in medicine 215

PHOTOSYNTHESIS
Reaction mechanisms responsible for transformation of pertechnetate in photoautotrophic organisms 255

PLANT TOXICITY
Cytological effects of Tc on young soybean plants 289

PLASMOLYSIS, CELL
Cytological effects of Tc on young soybean plants 289

PLUTONIUM
A Bayesian methodology for scaling radiation studies from animals to man S411
Comparative skeletal distribution of Am and Pu in man, monkey, and baboon S81
Comparative toxicology of inhaled $^{239}PuO_2$ in dogs and rats S331
Estimation of human gonadal Pu and Ce concentrations from animal data S97
Gastrointestinal absorption of selected radionuclides 499
Mass loading of soil particles on plant surfaces 935
Preparation and analysis of spike soil standards 208
Reassessment of human and beagle dog Pu excretion data based on reevaluation of human Pu excretion data S211
Three example applications of optimization techniques to Department of Energy contractor radiation protection programs 873
Time-related factors in the study of risks in animals and humans S379

PLUTONIUM-239
Biomathematical modeling of ^{239}Pu retention, skeletal label kinetics, and local dosimetry in dogs S243
Distribution of ^{239}Pu in occupationally exposed workers, based on radiochemical analyses of three whole bodies S89
Improved counting efficiencies for measuring ^{239}Pu in the lung in the sitting position 747
Is the beagle dog an appropriate experimental animal for extrapolating data to humans on organ distribution patterns of U, Th, and Pu? S91
Kinetic model of the distribution of ^{239}Pu in the beagle skeleton 449
Plutonium distribution and oxidation states in a reactor leaching ponds system 607
Sensitivity testing of an age-related, multicompartment dosimetric model for bone-surface-seeking radionuclides in man S229
The use of animal experiments for assessing annual limits on intake and interpreting chest-monitoring data for workers exposed to industrial actinide-bearing dusts S221

POLONIUM-210
The importance of acid digestion of urine prior to spontaneous deposition of ^{210}Po 615

POLONIUM-218
Determining the charged fractions of ^{218}Po and ^{214}Pb using an environmental gamma-ray and Rn detector 51
The half-life of ^{218}Po 121
Use of electrostatic collection of ^{218}Po for measuring Rn 39

POLY-BORON
Studies of the neutron transport and shielding properties of locally developed shielding material: poly-boron 819

POSITRON EMISSION TOMOGRAPHY
Performance of a well counter and a dose calibrator for quantitative positron emission tomography 623

POTASSIUM
Seasonal variation of soil-to-plant transfer of K and fallout ^{134,137}Cs in peatland vegetation 593

POTASSIUM-40
Assessment of radiological emissions from Spanish coal power plants: radioactive releases and associated risks 765
Body K and ^{40}K in Chinese subjects measured with a whole-body counter 743
Environmental radioactivity levels in marine species from Malaysia and Fiji 187

POWER PLANT, COAL-FIRED
Assessment of radiological emissions from Spanish coal power plants: radioactive releases and associated risks 765
Effect of redox potential on fixation of ^{137}Cs in lake sediment 781

PREGNANCY
Factors affecting the placental transfer of actinides S109

PROPORTIONAL COUNTER
A multi-element proportional counter for radiation protection measurements 631

PUBLIC INFORMATION
Comment to 'A New Intellectual Atmosphere' by President Alexander 206
Communicating with the public about long-range storage of high-level radioactive waste S5
Introduction to the H. M. Parker Lecture S3

RADIUM-226
An alternative method for Ra determinations in water 71
Radium-226 content of beverages 761
Simultaneous determination of ^{224}Ra, ^{226}Ra and ^{228}Ra in large volumes of well waters 167

RADIUM-228
Simultaneous determination of ^{224}Ra, ^{226}Ra and ^{228}Ra in large volumes of well waters 167

RADON
An activated charcoal-based, liquid scintillation-analyzed airborne Rn detector 43
Bias in United States U miners' exposure data 169
Correlation of lung dose with Rn concentration, potential alpha-energy concentration and daughter surface deposition: A Monte Carlo analysis 429
Cross contamination between alpha-track detectors 163
Evidence of exhalation of stored environmental Rn determined by whole-body counting 161
Health physics annotated bibliography 790
Long-term measurements of Rn and short-lived Rn daughter concentrations in natural gas from distribution line 989
Radioactive materials and emergencies at sea. International intercalibration and intercomparison of radon, thoron and daughters measuring equipment. The biological basis for the control of prenatal irradiation. 644
The 1989 Radon Industry Directory 499

RADON DAUGHTERS
A charcoal coil measurement system for environmental ^{222}Rn 801
A survey of winter, summer and annual average ^{222}Rn concentrations in family dwellings 465
Evaluation of MDA instant working level meters 61
Long-term measurements of Rn and short-lived Rn daughter concentrations in natural gas from distribution line 989
Lung cancer risk from indoor radon exposures to radon daughters 218
Radioactive materials and emergencies at sea. International intercalibration and intercomparison of radon, thoron and daughters measuring equipment. The biological basis for the control of prenatal irradiation. 644
The half-life of ^{218}Po 121

RADON, INDOOR
A direct correlation among indoor Rn, soil gas Rn and geology in the Reading Prong near Boyertown, Pennsylvania 155
Correlation among the terrestrial gamma radiation, the indoor air ^{222}Rn, and the tap water ^{222}Rn in Switzerland 753
Expected indoor ^{222}Rn levels in counties with very high and very low lung cancer rates 897

RADON-220
Comments on Bigu's 'Relationship of ^{220}Rn and ^{222}Rn progeny levels in Canadian underground U mines' 210

RADON-222
A charcoal coil measurement system for environmental ^{222}Rn 801
Comments on Bigu's 'Relationship of ^{220}Rn and ^{222}Rn progeny levels in Canadian underground U mines' 210
Correlation among the terrestrial gamma radiation, the indoor air ^{222}Rn, and the tap water ^{222}Rn in Switzerland 753
Determining the charged fractions of ^{218}Po and ^{214}Pb using an environmental gamma-ray and Rn detector 51
Evaluation of MDA instant working level meters 61
Expected indoor ^{222}Rn levels in counties with very high and very low lung cancer rates 897
Investigations of a specific surface area of a material on the basis of ^{222}Rn emanation coefficient measurements 23
Is transpiration an important mechanism for release of ^{222}Rn to the atmosphere? 1038
Multi-state surveys of indoor ^{222}Rn 891
Protocol for indoor ^{222}Rn measurements 842
Protocol for indoor ^{222}Rn measurements: A reply 843
Radon risk and remedy 992
Reply to 'Is transpiration an important mechanism for release of ^{222}Rn to the atmosphere?' 1039
Response to 'Modeling the effects of exhaust ventilation on ^{222}Rn, entry rates and indoor ^{222}Rn concentrations' 1035
The half-life of ^{218}Po 121
Two ways of determining ^{222}Rn emanation coefficient 481
Use of electrostatic collection of ^{218}Po for measuring Rn 39

RADON-222, INDOOR
A survey of winter, summer and annual average ^{222}Rn concentrations in family dwellings 465
Estimating Rn-induced lung cancer in the United States 417
Increased indoor Rn levels due to actinide containing mineral collections displayed in living areas 413
Indoor Rn levels in different geological areas in Switzerland 29
Lung cancer risk from indoor radon exposures to radon daughters 218
Multi-state surveys of indoor ^{222}Rn 891
Protocol for indoor ^{222}Rn measurements 842
Protocol for indoor ^{222}Rn measurements: a reply 843
Reply to Fremlin 1035

REFERENCE MAN
Daily intake of 11 elements in relation to reference Japanese man 551
The postnatal growth of ICRP target organs in reference humans: spleen and liver 927

REGULATIONS
Comments on various views on the concept of 'de minimis' 211
Living without landfills: confronting the 'low-level' radioactive waste crisis 217
Safety limits for the release of short-lived radionuclides 492
Summary statements from the Second Conference on Radiation Protection and Dosimetry 461

RESPIRATORY SYSTEM
A method for comparison of animal and human alveolar dose and toxic effect of inhaled ozone S37
Age-related scaling for aerosol and vapor deposition in the upper airways of humans S293
Flow distribution in human and canine tracheobronchial airway casts S21
Human respiratory tract model for radiological protection: A revision of the ICRP dosimetric model for the respiratory system S249
Human subject age and activity level: factors addressed in a biomathematical deposition program for extrapolation modeling S49
Modeling accumulations of particles in lung during chronic inhalation exposures that lead to impaired clearance S61
Overview of NCRP Task Group activities on respiratory tract dosimetry modeling S291
Predictions of ozone absorption in human lungs from newborn to adult S29
Retention patterns for inhaled particles in the lung: comparisons between laboratory animals and humans for chronic exposures S69
Structural differences between human and rat lungs: implications for Monte Carlo modeling of aerosol deposition S41
The current approach of the ICRP Task Group for modeling doses to respiratory tract tissues S271

RISK ANALYSIS
Biologically motivated models for chemical risk assessment S129
Comment to 'A New Intellectual Atmosphere' by President Alexander 206
Comparative carcinogenicity of ionizing radiation and chemicals 926
Dose paradigms for inhaled vapors of primary carcinogens and their impact on risk assessment S333
Evaluation of highly ionizing components in high-energy nucleon radiation fields 717

RISK ANALYSIS (CONTINUED)
Fitting a model to categorical response data with application to species extrapolation of toxicity S405
Inhalation reference dose (RfD_i): an application of interspecies dosimetry modeling for risk assessment of insoluble particles S177
Interspecies scaling for cancer risk assessment S403
Living with radiation: the risk, the promise 992
On the unit of dose equivalent and the linear hypothesis 495
Population exposure from nuclear medicine procedures: measurement data 725
Recent developments in carcinogenic risk assessment S313
Risk considerations related to lung modeling S283
Risks of radioactive material transportation accidents in Oregon 131
Scaling of fetal cancer risks from laboratory animals to man S419
Time-related factors in the study of risks in animals and humans S379
Toxicity of ^{99}Tc: Can it represent a risk to man? 345

RUTHENIUM
Isotopic composition of high-activity particles released in the Chernobyl accident 707

SAFETY STANDARDS
Implications of nuclear safety requirements for the protection of workers in nuclear facilities 500
Protocols for the radiation safety surveys of diagnostic radiologic equipment 216
Relationship between kidney burden and radiation dose from chronic ingestion of U: implications for radiation standards for the public 9
Safety limits for the release of short-lived radionuclides 492

SAMPLING
Multi-state surveys of indoor ^{222}Rn 891

SCALING
A Bayesian methodology for scaling radiation studies from animals to man S411
Aerosol deposition in the nose as a function of body size S299
Age-related scaling for aerosol and vapor deposition in the upper airways of humans S293
Choice of dose measure for extrapolating carcinogenic risk from animals to humans: an empirical investigation of 23 chemicals S387
Inhalation reference dose (RfD_i): an application of interspecies dosimetry modeling for risk assessment of insoluble particles S177
Interspecies scaling for cancer risk assessment S403
Modeling for scaling to humans: Time to get serious S13
Modeling for scaling to man: biology, dosimetry, and response S1

SCALING (CONTINUED)
Pharmacokinetic parameters for interspecies scaling using allometric techniques S159
Scaling of fetal cancer risks from laboratory animals to man S419
Serial allometric factor extrapolation: Compartmental and physiological pharmacokinetic approaches S395

SCINTILLATION CHAMBER
Long-term measurements of Rn and short-lived Rn daughter concentrations in natural gas from distribution line 989

SCREENING MEASUREMENTS
Multi-state surveys of indoor ^{222}Rn 891

SEDIMENTS
Role of various microorganisms on Tc behavior in sediments 791

SHIELDING
Estimation of absorbed dose due to gas bremsstrahlung from electron storage rings 407
Scattered radiation determination in medical x-ray shielding computations 669
Some remarks on secondary protective barrier calculation for radiographic installations: NCRP report no. 49 revisited 1025
Studies of the neutron transport and shielding properties of locally developed shielding material: poly-boron 819

SKELETON
Biomathematical modeling of ^{239}Pu retention, skeletal label kinetics, and local dosimetry in dogs S243
Comparative skeletal distribution of Am and Pu in man, monkey, and baboon S81
Daily intake of 11 elements in relation to Reference Japanese Man 551
Kinetic model of the distribution of ^{239}Pu in the beagle skeleton 449
Sensitivity testing of an age-related, multicompartment dosimetric model for bone-surface-seeking radionuclides in man S229
Tetracycline in uranyl nitrate intoxication: its action on renal damage and U retention in bone 403

SOFTWARE REVIEWS
An overview of the National Nuclear Data Center (NNDC) 680
Sigma-Plot, Version 3.1 679
An overview of the Radiation Shielding Information Center (RSIC) 497
Introduction and T^3 Scientific Word Processing System, version 2.21 213
MicroShield, Version 3.12 1041

SOIL
A direct correlation among indoor Rn, soil gas Rn and geology in the Reading Prong near Boyertown, Pennsylvania 155
Bioaccumulation and chemical modification of Tc by soil bacteria 239
Bioavailability of Tc incorporated in plant material 263
Cesium-137 in Montana soils 955
Impact of correlations on stochastic estimates of soil contamination and plant uptake 653
Long-term availability of Tc deposited on soil after accidental releases 247
Mass loading of soil particles on plant surfaces 935
Preparation and analysis of spike soil standards 208
Preparation of soil standards for radiochemical analysis 207
Reassessment of ^{137}Cs in soils from Chernobyl fallout 494
Reply to comments on ^{137}Cs in soils from Chernobyl fallout 494
Results of a cleanup and treatment test at the Nevada test site: evaluation of vacuum removal of Pu-contaminated soil 771
Role of various microorganisms on Tc behavior in sediments 791

SOIL-TO-PLANT TRANSFER
Bioavailability of Tc incorporated in plant material 263
Long-term availability of Tc deposited on soil after accidental releases 247
Synopsis of French experimental and in situ research on the terrestrial and marine behavior of Tc 269

SOVIET UNION
Final warning: the legacy of Chernobyl 218

SPECIES COMPARISONS
Comparative skeletal distribution of Am and Pu in man, monkey, and baboon S81
Distribution of ^{239}Pu in occupationally exposed workers, based on radiochemical analyses of three whole bodies S89
Estimation of human gonadal Pu and Ce concentrations from animal data S97
Factors affecting the placental transfer of actinides S109
Multiparameter extrapolation of biodistribution data between species S121
Ordering of metal-ion toxicities in different species-extrapolation to man S115
Retention patterns for inhaled particles in the lung: comparisons between laboratory animals and humans for chronic exposures S69

SULFUR
Comparative metabolic behavior and interrelationships of Tc and S in soybean plants 281

SULFUR-35
Incineration and monitoring of low-level ^{35}S wastes at a biological research institution 191
Lineal energy distributions and effective quality factor for ^{35}S beta particles 659

SURFACE CONTAMINATION
Mass loading of soil particles on plant surfaces 935

SURVEYS
Multi-state surveys of indoor ^{222}Rn 891
Protocols for the radiation safety surveys of diagnostic radiologic equipment 216

SWITZERLAND
Correlation among the terrestrial gamma radiation, the indoor air ^{222}Rn, and the tap water ^{222}Rn in Switzerland 753
Increased indoor Rn levels due to actinide containing mineral collections displayed in living areas 413
Indoor Rn levels in different geological areas in Switzerland 29

SYNCHROTRON
Measurements of radioactive gaseous releases to air from target halls at a high-energy proton accelerator 909

TECHNETIUM
Bioaccumulation and chemical modification of Tc by soil bacteria 239
Comparative metabolic behavior and interrelationships of Tc and S in soybean plants 281
Long-term availability of Tc deposited on soil after accidental releases 247
Reaction mechanisms responsible for transformation of pertechnetate in photoautotrophic organisms 255
Role of various microorganisms on Tc behavior in sediments 791
Synopsis of French experimental and in situ research on the terrestrial and marine behavior of Tc 269
Technetium metabolism by lactating goats 321
The uptake of TcO_4^- by plants: A mathematical description 309

TECHNETIUM-99
Assessment of dose to man from releases of ^{99}Tc in fresh water systems 337
Bioavailability of Tc incorporated in plant material 263
Cytological effects of Tc on young soybean plants 289
Technetium absorption and turnover in monogastric and polygastric animals 315

TECHNETIUM-99 (CONTINUED)
The behavior of technetium in terrestrial and aquatic environs: a symposium 237
Toxicity of ^{99}Tc: Can it represent a risk to man? 345

TECHNETIUM-99m
Half-life of ^{99m}Tc in linearity testing of radionuclide calibrators 673
Technetium metabolism in goats and swine 331

TELLURIUM-124
Comparative dosimetry of ^{124}Te(p,2n)^{123}I and ^{124}Xe(p,2n)^{123}I 195

TERRESTRIAL ANIMALS
Technetium metabolism by lactating goats 321
Technetium metabolism in goats and swine 331

TETRACYCLINE
Tetracycline in uranyl nitrate intoxication: its action on renal damage and U retention in bone 403

THERMOLUMINESCENCE
Thermoluminescence dosimetry of gamma rays from the Hiroshima atomic bomb at distances 1.91-2.05 km from the hypocenter 1003

THORIUM
A sensitive method for the determination of Th in body fluids 393
Increased indoor Rn levels due to actinide containing mineral collections displayed in living areas 413

THORIUM-232
Assessment of radiological emissions from Spanish coal power plants: radioactive releases and associated risks 765
Is the beagle dog an appropriate experimental animal for extrapolating data to humans on organ distribution patterns of U, Tn, and Pu? S91

THORON
Radioactive materials and emergencies at sea. International intercalibration and intercomparison of radon, thoron and daughters measuring equipment. The biological basis for the control of prenatal irradiation. 644.

THYROID
Dietary intake of stable I and some aspects of radioiodine dosimetry 471
Toxicity of ^{99}Tc: Can it represent a risk to man? 345

TISSUE SAMPLING
Uranium in the tissues of an occupationally exposed individual 17

TOXICITY
A method for comparison of animal and human alveolar dose and toxic effect of inhaled ozone S37
Comparative toxicology of inhaled $^{239}PuO_2$ in dogs and rats S331
Fitting a model to categorical response data with application to species extrapolation of toxicity S405
Modeling accumulations of particles in lung during chronic inhalation exposures that lead to impaired clearance S61
Ordering of metal-ion toxicities in different species-extrapolation to man S115

TRANSFER COEFFICIENT
Experimental determination of transfer coefficients of ^{137}Cs and ^{131}I from fodder into milk of cows and sheep after the Chernobyl accident 967
Transfer of ^{137}Cs to milk and meat in Hungary from Chernobyl fallout with comparisons of worldwide fallout in the 1960s 587

TRANSFORMATION FACTOR
Multiparameter extrapolation of biodistribution data between species S121

TRANSPIRATION
Is transpiration an important mechanism for release of ^{222}Rn to the atmosphere? 1038
Reply to 'Is transpiration an important mechanism for release of ^{222}Rn to the atmosphere?' 1039

TRANSPORT, ENVIRONMENTAL
Bioavailability of Tc incorporated in plant material 263
Impact of correlations on stochastic estimates of soil contamination and plant uptake 653
Predicting the nuclide fraction transferred to consumption through grain foods 601
Seasonal variation of soil-to-plant transfer of K and fallout $^{134,137}Cs$ in peatland vegetation 593
The uptake of TcO_4^- by plants: A mathematical description 309

TRITIUM
Fallout ^{3}H in human tissue at Akita, Japan 559
Further study on fallout ^{3}H ingestion in Akita, Japan 565

TUMOR
A stochastic model of the acquisition of drug resistance during antineoplastic chemotherapy S349
Mathematical models of cell survival after ionizing radiation: application to radiotherapy planning S355
Reassessment of human and beagle dog Pu excretion data based on reevaluation of human Pu excretion data S211
Radiation and cutaneous neoplasms 206

TURKISH TEA
Chernobyl radioactivity in a Turkish tea drinker 1017

ULTRASOUND
Sensitivity of effective radiating area measurement for therapeutic ultrasound transducers to variations in hydrophone scanning technique 637

ULTRAVIOLET RADIATION
Radiation and cutaneous neoplasms 206

UNITED STATES URANIUM REGISTRY
Uranium in the tissues of an occupationally exposed individual 17

UNITS, SI
The advantages and simplifications of SI units in health physics 149

UPTAKE, PLANT
Chernobyl-derived ^{137}Cs and ^{134}Cs in heather plants in Northwest England 485
Comparative metabolic behavior and interrelationships of Tc and S in soybean plants 281
Impact of correlations on stochastic estimates of soil contamination and plant uptake 653
Predicting the nuclide fraction transferred to consumption through grain foods 601
Seasonal variation of soil-to-plant transfer of K and fallout $^{134,137}Cs$ in peatland vegetation 593
The uptake of TcO_4^- by plants: A mathematical description 309

URANIUM
A model for scaling the results of U excretion rate studies in beagle dogs to man S199
Abnormal concentration of U in many brands of South American cigarette tobacco 844
Comments on Bigu's 'Relationship of ^{220}Rn and ^{222}Rn progeny levels in Canadian underground U mines' 210
Determination of U in urine: comparison of ICP-mass spectrometry and delayed neutron assay 171
Increased indoor Rn levels due to actinide containing mineral collections displayed in living areas 413
Is the beagle dog an appropriate experimental animal for extrapolating data to humans on organ distribution patterns of U, Th, and Pu? S91
Is transpiration an important mechanism for release of ^{222}Rn to the atmosphere? 1038
Isolation and characterization of hot particles from Chernobyl fallout in southwestern Finland 975
Radioactivity and health: a history 1002
Tetracycline in uranyl nitrate intoxication: its action on renal damage and U retention in bone 403

URANIUM (CONTINUED)
The behavior and chemical toxicity of U in the kidney: A reassessment 365
Uranium assay in milk and drug samples using solid-state track detectors 985
Uranium in the tissues of an occupationally exposed individual 17

URANIUM MINES
Bias in United States U miners' exposure data 169

URANIUM-233
A sensitive method for the determination of Th in body fluids 393

URANIUM-238
Assessment of radiological emissions from Spanish coal power plants: radioactive releases and associated risks 765
Correlation among the terrestrial gamma radiation, the indoor air ^{222}Rn, and the tap water ^{222}Rn in Switzerland 753
Relationship between kidney burden and radiation dose from chronic ingestion of U: implications for radiation standards for the public 9

VENTILATION
Reply to Fremlin 1035
Response to 'Modeling the effects of exhaust ventilation on ^{222}Rn, entry rates and indoor ^{222}Rn concentrations' 1035

VIDEO DISPLAY TERMINAL
Measurements of electromagnetic emissions from video display terminals at the frequency from 30 Hz to 1 MHz 79

WASTE DISPOSAL
Communicating with the public about long-range storage of high-level radioactive waste S5
Design and evaluation of a cart for the collection and segregation of low-level radioactive waste 993
Destruction of genotoxic wastes mixed with radioactive products 885
Effect of redox potential on fixation of ^{137}Cs in lake sediment 781
Introduction to the H. M. Parker Lecture S3
Technetium-99 cycling in maple trees: characterization of changes in chemical form 299

WASTE MANAGEMENT
Communicating with the public about long-range storage of high-level radioactive waste S5
Destruction of genotoxic wastes mixed with radioactive products 885
Introduction to the H. M. Parker Lecture S3
Living without landfills: confronting the 'low-level' radioactive waste crisis 217
Use of a simulation model in occupational dose assessment at a high-level radioactive waste repository 107

WASTE, LOW-LEVEL
Design and evaluation of a cart for the collection and segregation of low-level radioactive waste 993
Incineration and monitoring of low-level ^{35}S wastes at a biological research institution 191
Living without landfills: confronting the 'low-level' radioactive waste crisis 217

WATER
Simultaneous determination of ^{224}Ra, ^{226}Ra and ^{228}Ra in large volumes of well waters 167

WATER VAPOR
Use of electrostatic collection of ^{218}Po for measuring Rn 39

WATER, GROUND
An alternative method for Ra determinations in water 71
Cross contamination between alpha-track detectors 163
Effect of redox potential on fixation of ^{137}Cs in lake sediment 781

WATER, SURFACE
Assessment of dose to man from releases of ^{99}Tc in fresh water systems 337

WEAPONS
Cesium-137 in Montana soils 955
Crimes of official science: a case book 215
Military radiobiology 499
Nuclear fear: a history of images 216

WHOLE-BODY COUNTING
Body K and ^{40}K in Chinese subjects measured with a whole-body counter 743
Evidence of exhalation of stored environmental Rn determined by whole-body counting 161
Measurements of Cs-absorption and retention in man 571
Measurements of whole-body radiocesium at the Harwell Laboratory, 1976-1988 995

WORKING LEVELS
Correlation of lung dose with Rn concentration, potential alpha-energy concentration and daughter surface deposition: A Monte Carlo analysis 429

X RAYS
Routine calibration of automatic exposure control systems for diagnostic x-ray machines: a 5-y progress report 1021
Scattered radiation determination in medical x-ray shielding computations 669
Some remarks on secondary protective barrier calculation for radiographic installations: NCRP report no. 49 revisited 1025
Stray radiation from baggage x-ray equipment: results and implications 141
